

Roadmap for Addressing PFAS Contamination: Steps for Farmer Support

At any point in this process, please do not hesitate to contact MFT for support. Tricia Rouleau, trouleau@mainefarmlandtrust.org, our Farm Network Director, is our point of contact for general questions about PFAS and the resources available to you. Hannah Chamberlain, hchamberlain@mainefarmlandtrust.org, our Stewardship Program Manager, is also available to hear your concerns and is the point of contact for easement landowners.

Determine Testing Needs and Access Financial Support:

1. Investigate your risk level by reading the [“Guide to Investigating PFAS on Your Farm.”](#)
2. Explore the [Department of Environmental Protection \(DEP\) map of licensed sludge and septage sites](#). We are available to help you navigate and understand this map. Contact Rouleau at trouleau@mainefarmlandtrust.org or 207-338-6575. For questions about DEP PFAS testing, “tier” status of your property, concerns about your residential well, and spreading record details for your property contact Tracy Kelly, public service coordinator, PFAS and emerging contaminants, via email at pfas.dep@maine.gov or by phone at 207-480-0583.
3. **Starting March 1:** Apply for an award that will cover the upfront costs of PFAS testing for water, milk or forage [here](#). Applications will be reviewed weekly. Awarded farmers must agree to share their test results with MFT and state agencies so high results can be reimbursed. Tier 1 spreading sites will be prioritized.
4. If you do not qualify for financial support (you do not farm commercially or earn less than 50% of household income from the farm, or are not Indigenous) we advise you to use the Maine Center for Disease Control and Prevention (CDC) [water sampling guidelines](#) and send them to [Maine Environmental Laboratory](#), 207-846-6569, to conduct your own water test or contact [Northern Tilth](#), 207-338-5500, for other sampling needs.

If You Receive a High Test Result:

5. Contact Maine Department of Environmental Protection. They will reimburse **household water** testing laboratory fees and provide additional on-site testing and support such as a carbon water filter. Contact David Madore, Maine Department of Environmental Protection deputy commissioner — david.madore@maine.gov, 207-287-5842. For health-related questions, contact Maine Center for Disease Control and Prevention. Contact Andrew Smith, Maine CDC state toxicologist — andy.e.smith@maine.gov, 207-287-5189.

6. Contact Maine Department of Agriculture, Conservation and Forestry (DACF). They will reimburse **high agricultural** testing laboratory fees, conduct additional on-site testing and provide support such as a carbon water filtration for agricultural water sources. Contact Nancy McBrady, bureau director — nancy.mcbrady@maine.gov, 207-287-7522. Additional contacts for questions about DACF PFAS testing and concerns about agricultural water sources are on the contacts sheet below.

Enroll in Income Replacement Program:

7. Nancy McBrady (**step 6**) will provide a referral that will make you eligible for the Income Replacement Program administered by Maine Farmland Trust (MFT) and the Maine Organic Farmers and Gardeners Association (MOFGA).
8. To enroll in the Income Replacement Program, confirm that you earn at least 50% of your family income from your farm business, you have stopped sales of contaminated products, and we have received a [W-9 form](#) and a recent Schedule F (or other IRS tax filing form used by your farm business) from you. You will then be enrolled and paid weekly through MFT and MOFGA until the state indemnity program by DACF begins or the fund runs out of money. Participants agree to have their Income Replacement award deducted from the lump sum payment they receive from the Maine indemnity program in order to replenish the emergency fund that will continue to support contaminated farms.

Other support:

Community

- To connect in a confidential space with other farms impacted by PFAS contamination please contact ironwoodorganic@gmail.com to be added to a Google Group.

Financial support

- If you have been paying into unemployment, you and your employees can file for unemployment [here](#).

Crisis support

- Contact [Farm Aid](#) — available Monday-Friday, 9 a.m. to 10 p.m., at 1-800-327-6243. They may be able to connect you with resources, and you will elevate the issue of PFAS within their organization.
- Maine Statewide Crisis and Suicide Prevention Hotline: 1-888-568-1112
- Crisis Text Line : Text "CONNECT" to 741741
- [211](#) — to find counselors who can speak with you
- [Maine Mobile Health](#)
- [Maine Agricultural Mediation Program](#)

Policy needs

- Please contact our Policy and Research Director, Ellen Stern Griswold egriswold@mainefarmlandtrust.org or 207-338-6575 ex. 307, to support you in voicing your policy needs. She can help you arrange meetings with public officials and help with strategy to achieve your policy goals.

Litigation

- To pursue legal action, connect with a lawyer through the
 - [Legal Food Hub](https://www.legalfoodhub.org/), 1-844-529-4769 ext. 2 and legalfoodhub@clf.org
 - and/or [Conservation Law Foundation](https://www.conservationalaw.org/) at 617-350-0990 and e-info@clf.org.
